

BibleWorks

The Premier Biblical Exegesis Software Tool

A TIGHTLY INTEGRATED
RESOURCE FOR STUDYING
THE BIBLICAL TEXT IN THE
ORIGINAL LANGUAGES

If you are involved in detailed study of the Bible, look no further! With its combination of a powerful search engine, key databases and a streamlined, customizable interface, BibleWorks gives you quick access to the critical information you need to interpret Scripture.

Why Use BibleWorks?

BIBLEWORKS IS THE FASTEST, MOST COMPREHENSIVE AND INTEGRATED EXEGETICAL SOFTWARE TOOL AVAILABLE

BibleWorks is designed to take advantage of what computers do best – searching databases – and apply that efficiency to the field of original language research of the Biblical text. Thousands of seminary students, pastors, and serious Bible scholars find BibleWorks indispensable when studying the Greek or Hebrew text. Its combination of power and flexibility allows you to do research once thought impossible!

Whether you are studying for class, preparing a sermon, writing a paper or performing complex morphological analysis, BibleWorks has the features and databases you need – at a very affordable price.

BUILT FOR SPEED

Its powerful search engine gives quick access to the information you need with just a few mouse clicks. In fact, for tagged Bible versions, parsing information and lexical entries for words appear automatically as the mouse cursor moves over the words.

With BibleWorks, there's no more thumbing back and forth through concordances and lexicons. You can find all occurrences where the words "faith" and "work" or "works" appear in different Bible versions. Or quickly find those same words wherever they appear within three verses of each other. Imagine finding all verses containing the phrase "וַיֹּאמֶר אֱלֹהִים" ... or searching the Greek New Testament to see where "παρακαλέω" is used in the imperative. With BibleWorks, this can be done in seconds. Then, transfer the results and lists of verses you created to your word processor, or save them in a file for further research.

THOROUGH RESEARCH – NO CLUTTERED DESKS

Keep your lexicons, dictionaries and concordances on the shelf as you do textual study because BibleWorks fits as much lexical and morphological information on screen as possible – without getting in the way of the text and other resources.

ABOVE: BibleWorks' main window reveals a wealth of information without being cluttered. RIGHT: The Synopsis Window is editable for in-depth comparative studies.

When you are working with a particular Greek or Hebrew version and want lexical information for a word, just point to the word with your mouse. Or, with a couple of clicks, find all occurrences of that word, or look it up in other lexicons. Even your notes (containing Greek and Hebrew if you want) can be linked to verses so they automatically pop up any time the verse is opened.

INTRICATE SEARCHES ARE A SNAP

No other software does complex exegetical searches faster than BibleWorks. The possibilities are limitless!

- Search for words, phrases, parts of speech, tenses, etc.
- Put wildcards anywhere.
- Search for articles and prepositions.
- Look for repeated words in a string, specify agreement, and exclude words — all in the same query.
- Limit the search to a specific collection of passages or books, or search the entire Bible.

Our goal is – and always has been – to provide an exegetical software tool that simplifies your study of the Biblical texts and enables you to do things that would otherwise be impractical or even impossible.

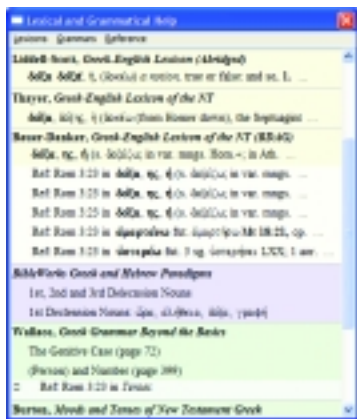

FOCUS ON THE ORIGINAL TEXTS

BibleWorks contains all major original language texts including the BHS Hebrew Old Testament, Rahlf's LXX, the Nestle-Aland (27th edition) and UBS (4th edition) Greek New Testaments, as well as several majority text versions – even the Peshitta. In the versions that are tagged, every word is lemmatized and hypertext-linked to the Greek and Hebrew lexicons in BibleWorks. Plus, BibleWorks 6 includes the Groves-Wheeler Westminster Old Testament Hebrew Morphology, version 4.0 – providing the latest changes and corrections, with the ability to display complete tag information, including editorial comments.

Look up any Greek word in the Louw-Nida, Friberg, Thayer, Barclay-Newman, or Liddell-Scott Lexicons. For Hebrew, BibleWorks has the Brown-Driver-Briggs lexicon or the Theological Wordbook of the Old Testament. The time-consuming exercise of flipping from page to page to find the right word is a thing of the past! Plus, you can add the Bauer-Danker (BDAG, 3rd edition) and the Koehler-Baumgartner (HALOT, 4th edition) lexicons – two of the most scholarly standard reference works available (separate purchase required). All these lexicons are fully searchable as well!

A HOST OF BIBLE VERSIONS

BibleWorks includes all the major English versions, as well as major Bible versions in 25 modern languages. These can be searched and displayed in a variety of ways. You can view multiple Bible versions in parallel columns or parallel rows. Multiple versions and multiple

The Lexical and Grammatical help window gives users quick access to information on each verse

The premier Bible study software program has just improved dramatically...

BibleWorks already had the ability to perform complex grammatical and syntactical searches. This version makes everything easier to do...

Having used BibleWorks in personal study and classroom instruction for several years, I thought further improvements would mainly involve adding databases and tweaking existing facilities.

The advances go far beyond what I expected. For simple Bible study or detailed language analysis, BibleWorks is the easiest, fastest, and best.

- Professor Rick Johnson
Professor of Old Testament
Southwestern Journal of Theology

sets of versions can be compared in the Results window with the differences highlighted in colors of the user's choice.

COMPREHENSIVE SET OF RESOURCES

A full complement of databases and resources are unlocked in the basic BibleWorks program. This gives every user a complete exegetical package, fully integrated, tagged, linked and ready to use. Plus, BibleWorks has a multi-faceted diagramming module with a simple but powerful graphical user interface, and a flexible flashcard module that has standard vocabulary sets or you can create your own lists. More details can be found in this brochure.

PERFECT FOR SEMINARY AND BEYOND

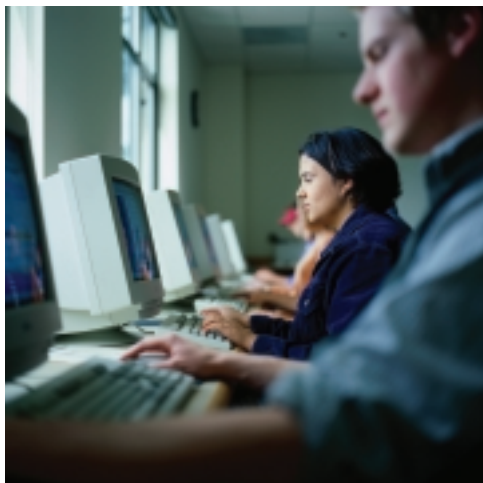

You can limit the search to a specific collection of passages or books, or search the entire Bible. There's no faster way to find answers to complex exegetical questions. Here are some examples:

- Find all verses with two nouns agreeing in gender, case, and number, separated by “καί” where an article precedes the first noun but not the second.
- Find within a context of ten words all instances of a dative or accusative participle not immediately preceded by an agreeing article, and followed by an agreeing article and noun, excluding cases where a word from a specified list intervenes.

Using the tagged Greek and Hebrew databases, you can do complex grammatical and morphological searches. The Morphology Assistant makes it simple to specify the exact grammatical construct you want.

TYPE IN GREEK AND HEBREW

BibleWorks has new Greek and Hebrew fonts that can be shared with anyone who uses Windows — in Internet Explorer, Wordpad, HTML Help, and Outlook. No other font set has this capability. These TrueType and PostScript fonts allow for accented Greek and pointed/accented Hebrew. The fonts print beautifully in any Windows word processor and, with the built-in editor, you can also take notes in English, Greek, and right-to-left Hebrew.

New Features

THESE RESOURCES PROVIDE GREATER FLEXIBILITY
AND ALLOW RESEARCH IN GREATER DEPTH

TEXT COLORING

Mark any text (in any Bible version) with colors and formatting options, such as bold, strike-through, italic and underline. The color markings for each version can be saved and shared with other BibleWorks users. Alternatively, versions can have multiple color sets for different uses.

Mark texts with color or formatting.

TEXT COMPARISON TOOL

Multiple versions and multiple sets of versions can be compared and the differences highlighted in your choice of colors. This, for example, allows you to immediately compare the King James to the New King James, or to see the differences between the Majority Text and the Nestle-Aland text.

Texts can be compared and the differences seen instantly.

AUTOCOMPLETE MORPH

Searching for specific forms in the original languages is much easier because as you type in your morphological codes, all correct options are instantly shown — making the "learning curve" much shorter and allowing you to search much faster.

POPUP GLOSS & DEFINITION TIPS

As your mouse passes over a word, a "pop-up flashcard" gives you the gloss for that word. It can function as a timed "popup" in a delayed fashion, or stay open and resize itself as the content changes. Word definitions for Greek New Testament and Hebrew Old Testament are also immediately displayed near your mouse as it passes over a word. It is similar to the Auto-Info window, but more succinct, allowing you greater speed in reading the text.

The popup definition tool and the popup gloss tips give users instant information about words under the mouse.

LEXICAL/GRAMMATICAL HELPS WINDOW

This gathers in one window all the available lexical and grammatical information for a Greek or Hebrew word. The contents automatically change as you move the mouse over the tagged Bible text. All references to the current verse are also shown.

BibleWorks is amazingly fast, thorough, and easy to use, and is capable of a wide variety of simple or complex Bible searches. BibleWorks was also the single program in constant use, day after day, by several members of our Translation Oversight Committee when we produced the English Standard Version of the Bible. I highly recommend it.

Wayne Grudem, Ph.D.
Research Professor of Bible and Theology
Phoenix Seminary, Scottsdale, Ariz.
Past president, Evangelical Theological Society

FLASH CARDS

Students and teachers will appreciate the flexibility and power of the new BibleWorks flashcard feature. Build personal flashcard sets or use standard lists already included. Words can be filtered by frequency or verse range. From the simple to the complex, the flashcard utility will help students at any level learn Greek or Hebrew.

Users can create their own list of Greek or Hebrew words with the new BibleWorks flashcard feature.

DIAGRAMMING TOOL

You can create grammatical diagrams of any text using a tremendously flexible panoply of tools that offer many options. This allows students and pastors to gain a better grasp of the grammatical structure of the text being studied.

The new diagramming tool has flexible features and gives users an extensive array of tools and options.

GREEK/HEBREW PARADIGMS

There is a full set of Greek and Hebrew paradigms. These are linked to the resource center so a user can see the appropriate paradigm for a Greek or Hebrew word under the mouse cursor.

Students will appreciate how quickly they can navigate between the paradigms lists and the Bible texts.

GREEK/HEBREW FONTS

These new Greek and Hebrew fonts can be shared with anyone who uses Windows — they will even work in Internet Explorer, Wordpad, HTML Help, and Outlook.

BibleWorks allows you to develop your own passage outlines so you can identify sections according to your preferences.

EDITABLE OUTLINES

The Command Center Outline is now editable, allowing you to organize it as you desire. Multiple outlines can be created and saved. You can even switch back and forth between different outlines.

CLONE OPTION

With the click of a mouse the user can clone BibleWorks and open up a new version, complete with all the settings of the original, including verse lists, display versions, highlighting, etc. This makes it easy to work on a passage without losing your place.

BibleWorks ... is probably the most powerful and "user friendly" program available for original language study. Whether one is preparing sermons or lessons, meticulously exegeting the original text, or just simply doing personal in-depth study, BibleWorks is one of the best tools available.

PACKAGE AVAILABLE
FOR ORIGINAL
LANGUAGE EXEGESIS
OF THE BIBLICAL TEXT

BASIC HEBREW FOR BIBLE STUDY

by Mark Futato

This tutorial provides an intensive introduction to the Hebrew language. Users can gain sufficient knowledge of the language to use BibleWorks with greater effectiveness. It includes more than 1,000 sound files to help pronounce Hebrew correctly, plus exercises that are drawn largely from the Hebrew Bible itself. It also provides a useful bridge to the Futato full grammar, which is available as a separate add-on module with BibleWorks.

SYNTAX OF THE MOODS AND TENSES IN NEW TESTAMENT GREEK

by Ernest DeWitt Burton

Published in 1900, this remains one of the best and most succinct introductions to Greek moods and tenses. It is designed to assist students in the task of translating the Greek New Testament into English forms of thought and expression.

Burton's "Moods and Tenses" is fully linked to the BibleWorks texts, providing extensive capability for users to gain greater facility with the Greek language.

THE TARGUMIM

The Targum Aramaic Old Testament databases in BibleWorks are provided by Dr. Steve Kaufman and the Comprehensive Aramaic Lexicon (CAL) project at Hebrew Union College. The Targumim are parsed and lemmatized and tied to entries in the CAL Lexicon. This ongoing project will be updated periodically. The databases are copyrighted (2003) by the CAL Project in Cincinnati, Ohio.

GESENIUS' HEBREW GRAMMAR

Edited and enlarged by K. Kautsch

Translated by A.E. Cowley

Based on the 1910 Oxford edition, this edition remains a standard reference work on Hebrew grammar. It is useful for those taking formal Hebrew classes or just seeking to read Biblical Hebrew for personal study.

Scripture references in Gesenius' Hebrew Grammar are instantly linked to BibleWorks — helping students read and translate the Hebrew of the Bible.

THE CONSTANTINUS
TISCHENDORF APPARATUS

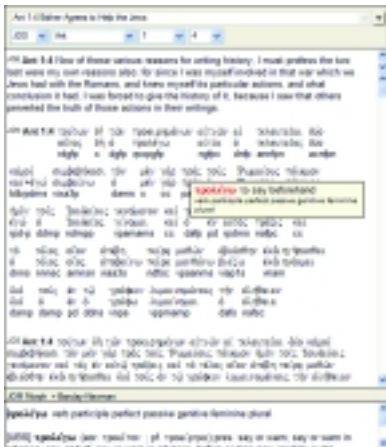

In addition to Tischendorf's Greek New Testament, we have added the "critical apparatus." This contains the complete text of Novum Testamentum Graece, editio octava critica maior, Vol. 1 & 2. It is color tagged and hyperlinked for easy reference. The electronic text metadata version is the 2003 copyrighted version by Clint Yale.

Users can quickly research textual differences using Tischendorf's "critical apparatus" — now fully integrated into BibleWorks.

WORKS OF FLAVIUS JOSEPHUS

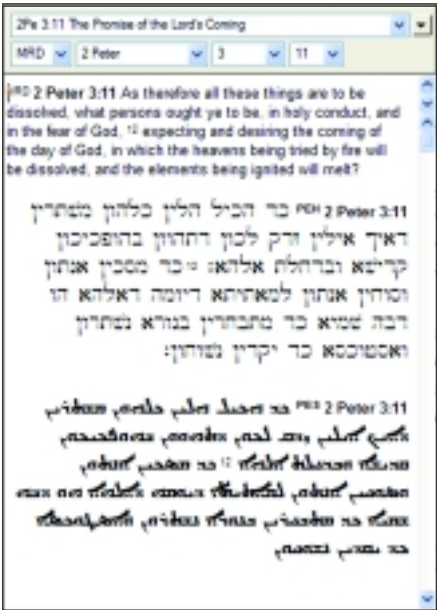

This database includes the complete works of Josephus, fully parsed and lemmatized, as well as the 1828 Whiston English Translation. The Greek text is based on the 1890 Niese edition. The morphological tagging is the result of collaboration between Dr. Jean-Noel Aletti and Dr. A. Gieniusz of the Pontifical Biblical Institute, and Michael Bushell of BibleWorks. Its initial release (Fall 2003) offers a usable edition, but editorial improvements (available through free Internet updates) are expected to be completed in 2004.

The importance of Josephus for New Testament studies is recognized universally.

THE PESHITTA

The Aramaic New Testament (Peshitta) used in BibleWorks is based on the traditional Western text. It is accompanied by the James Murdock English Translation (1852).

The inclusion of the Peshitta brings a new dimension to BibleWorks, further extending the many resources available to users for academic research and personal study.

WESTMINSTER SEMINARY
GROVES-WHEELER OLD
TESTAMENT HEBREW
MORPHOLOGY – VERSION 4.0

This edition contains numerous corrections and database improvements. BibleWorks now displays complete tagging information, including editorial comments.

ADDITIONAL NEW RESOURCES

Also included are the unabridged Matthew Henry Commentary, the Tyndale New Testament (1534), the Bishops' New Testament (1595), and more.

BibleWorks remains the best Bible research software available. The latest version has made significant improvements by making the program accessible to virtually any level of user and adding various additional texts and reference works. ...this is a program which the busy pastor, missionary, student or scholar will easily end up using on a daily basis.

Robert L. Plummer
Asst. Professor of New Testament Interpretation
The Southern Baptist Theological Seminary

Scholarly

THE BIBLE TEXTS & REFERENCES YOU NEED

REFERENCE WORKS

- International Standard Bible Encyclopedia, 1st Ed. (fully integrated)
- Faussett Bible Dictionary
- Synopsis of the Gospels (editable)
- A.T. Robertson's Word Pictures in the Greek NT
- Metzger's Bible Outline
- Treasury of Scripture Knowledge (644,000 cross references and notes)
- Easton's Bible Dictionary
- Nave's Topical Index (20,000 entries)
- Bible Timelines – Church and secular history (editable)
- [Matthew Henry's Commentary](#)

PROGRAM FEATURES & ANALYSIS TOOLS

- All versions, including Greek and Hebrew, are indexed and fully searchable, with options for case, accent and vowel point sensitivity where appropriate.
- All lexicons and dictionaries are also fully searchable.
- Complete lemmatization and parsing for Greek NT, LXX, and Hebrew OT versions
- [Color highlighting of text and search results](#) – can be saved in multiple sets
- Bible version comparison tools – highlight differences between Bible versions
- Diagramming module
- Hebrew and Greek vocabulary flashcards (complete sets), supporting print, electronic, and audio flashcards
- Clone BibleWorks – open multiple copies of the program
- Popup gloss window (definition and parsing information) displayed over Greek and Hebrew texts when mouse is held over word
- Autocomplete morphology codes – popup list of morphology codes opens as you type
- Lexical/Grammatical Helps Window – shows all related references for a word/verse as you move the mouse over text
- Bible outlines (editable) for the Results Window
- New, more robust versions of Greek and Hebrew fonts
- Accented Greek, accented and pointed Hebrew, and Cyrillic TrueType and PostScript fonts
- Built-in editor with right-to-left Hebrew typing
- View multiple Bible versions in parallel columns, in vertical comparative lines, or in full context
- Save and re-use search queries, lists of words, and lists of verses, and then plug them back in to new search queries.
- Popup window for copying text to external word processors with extensive control over formatting options
- As you move the mouse over tagged Bible text, instantly see parsing information, lexical information, and cross references
- Plot, compare, and export graphs of search results
- Annotate chapter or verses and have your notes automatically load when you view the verse again
- Three different interfaces, for beginners, intermediate users, and power users
- Find most/least frequently used words for arbitrary verse ranges
- Create and print custom lexicons from arbitrary verse ranges
- Favorite sets of search and display Bible versions - create and recall them
- Search limits – Limit searches to arbitrary verses or books
- Synopsis window – editable gospel parallel/synopsis
- Report Generator – auto-generate and print a report for a range of verses, including lexical information, morphological analysis, multiple Bible versions, word frequencies, etc.
- Create a custom lexicon based on the words in a particular passage
- Create your own Bible versions, full searchable and integrated
- Editable timelines
- Verse alignments between Bible versions – editable verse reference mappings (e.g. alignments between LXX to Hebrew OT)
- Export verses, chapters, books, and entire versions to ASCII text, RTF, and CCAT, using customizable font mappings
- Macro for typing Hebrew right-to-left in Microsoft Word 6/95/97/2000.

Help And Other Features

- Detailed manual (400 pages), on-line help, and ToolTips.
- [Nearly four and a half hours of instructional videos on the CD](#)
- Help on any screen item – place the cursor over the item and press F1

System Requirements

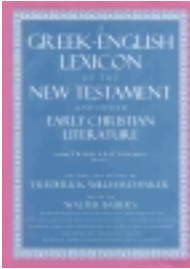

- Windows 95/98/ME/NT/2000/XP
- CD drive
- Minimum 32 MB RAM
- Minimum of 300 MB to a maximum of 1.4 GB hard drive space
- Sound card for Video Demos
- Internet connection needed for the free Internet updates

NOTE: [Text in blue indicates features new to BibleWorks 6.](#)

Essential Modules

Greek-English Lexicon of the New Testament and Other Early Christian Literature (unabridged, 3rd Ed.)

by Bauer, Danker, Arndt & Gingrich

This new updated American edition of Walter Bauer's *Wörterbuch zu den Schriften des Neuen Testaments* builds on its predecessor's staggering deposit of extraordinary erudition relating to Greek literature from all periods. Including entries for many more words, the new edition also lists more than 25,000 additional references to classical, intertestamental, Early Christian, and modern literature. This additional module requires BibleWorks 5 or greater.

Price: \$125

Special bundled price with HALOT: \$197

The Hebrew and Aramaic Lexicon of the Old Testament (unabridged, 4th Ed.)

by Koehler, Baumgartner, Stamm

Combines scholarly thoroughness with easy accessibility. The alphabetical ordering of entries rather than the traditional arrangement of words according to their roots maintains a user friendly face, which is particularly helpful to the beginning student, and will also save the advanced user much time. This additional module requires BibleWorks 5 or greater.

Price: \$159

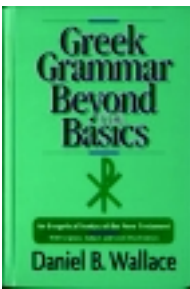

Special bundled price with BDAG: \$197

'...an easy to use lexicon, which will be essential for all students of Hebrew and which will greatly assist them in their reading of the Old Testament.'

THE EXPOSITORY TIMES

Greek Grammar Beyond the Basics: An Exegetical Syntax of the New Testament

by Daniel B. Wallace

While the trend of some grammarians has been to take a purely grammatical approach to the language, sound exegesis requires that students consider grammar within a larger framework, including the context, lexeme, and other linguistic features. Wallace's *Greek Grammar Beyond the Basics* combines the technical requirements for proper Greek interpretation with the actual interests and needs of Bible students. It is considered the most up-to-date Greek grammar available. It equips intermediate Greek students with the skills they need to do exegesis of biblical texts in a way that is faithful to the texts' intended meaning. The expanded edition contains a subject index, a Greek word index, and page numbers in the Syntax Summary section. Written by a world-class authority on textual criticism, it links grammar and exegesis to provide today's second-year Greek student with solid exegetical and linguistic foundations. This additional module requires BibleWorks 6.

Price: \$25

FULLY INTEGRATED WITH BIBLEWORKS

Beginning Biblical Hebrew

by Mark Futato

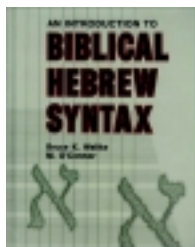

Achieving the right balance of information, style of presentation, and depth of instruction in first-year grammars is no easy task. But Mark Futato has produced a grammar that, after years of testing in a number of institutions, will please many with its concise, clear, and well-thought-out presentation of Biblical Hebrew. Because the teaching of biblical languages is in decline in many seminaries and universities, Futato takes pains to measure the amount of information presented in each chapter in a way that makes the quantity digestible without sacrificing information that is important to retain. The book includes exercises that are drawn largely from the Hebrew Bible itself. This additional module requires BibleWorks 6.

Price: \$25

An Introduction to Biblical Hebrew Syntax

by Bruce Waltke and M. O'Connor

Meeting the need for a textbook for classroom use after first year Hebrew grammar, Waltke and O'Connor integrate the results of modern linguistic study of Hebrew and years of experience teaching the subject into this book. In addition to functioning as a teaching grammar, this work will also be widely used for reference and self-guided instruction in Hebrew beyond the first formal year. Extensive discussion and explanation of grammatical points help to sort out points blurred in other introductory books. More than 3,500 Biblical Hebrew examples illustrate the points of grammar under discussion. Four indexes (Scripture, Authorities cited, Hebrew words, and Topics) provide ready access to the vast array of information found in the 40 chapters. Destined to become a classic work, this long-awaited book fills a major gap among modern publications on Biblical Hebrew. This additional module requires BibleWorks 6.

Price: \$43

Qumran Sectarian Manuscripts

Along with Biblical scrolls, the Dead Sea Scrolls include a collection of non-Biblical "sectarian manuscripts." These documents shed much light on the time period when the New Testament was written and include various Scripture commentaries, non-canonical works (such as the Book of Enoch), and other religious documents important to the Qumran sect (such as the Rule of the Community). Many modern Bible commentaries cite The Scrolls because written records of that time period are very scarce. The next oldest copy of the Old Testament available is dated 1,000 years later. Accordingly, the Dead Sea Scrolls help to provide a historical and social framework in which early Christianity developed. This additional module requires BibleWorks 6.

Price: \$80

The Hebrew portions of most of the secular manuscripts of the Dead Sea Scrolls have been tagged with lemmas and grammatical information by Dr. Martin Abegg, Associate Professor of Religious Studies at Hebrew Union College, and Co-Director of the Dead Sea Scrolls Institute at Trinity Western University, British Columbia.

FAITH & MISSION

Space does not permit the full explanation of what BibleWorks provides to we who would plumb the depths of Scripture more fully. Suffice it to say that I have used computers for many years to do research and to prepare my classes and I have found nothing of the depth and speed of BibleWorks, so much so that it is an invaluable and indispensable tool.

Shawn Madden, Ph.D., Assistant Professor of Hebrew and Old Testament
Southeastern Baptist Theological Seminary, Wake Forest, North Carolina

Reviews

REFORMED EPISCOPAL

Part of my specialty in teaching biblical languages is looking at Bible programs for the computer; I've seen most of them (Logos, QuickVerse, Gramcord, etc.). But this is the best, hands down. Virtually everything I do is crisp and instantaneous with help screens along the way for every function.

Rev. Dr. Curtis Crenshaw
Reformed Episcopal Theological Journal

CATHOLIC BIBLICAL QUARTERLY

Among the programs for biblical research, BibleWorks has to rank as one of the finest. The latest revision has brought it to the top of the line.

James P. McIlhone
Chair, Biblical Exegesis & Proclamation
Mundelein Seminary University of St. Mary
of the Lake

KERUX JOURNAL

BibleWorks 5.0 ... has all the texts the Old and New Testament scholar/user needs, plus the essential tools for penetrating those texts. This is a superb product at a reasonable price with prospects for continued expansion. That all translates to a bargain! Every church budget ought to include \$299.95 for this powerful tool. Their pastors will rise up and call them "blessed"!

James T. Dennison, Jr.
Professor of Church History & Academic Dean
Kerux, the Journal of Northwest Theo. Seminary

DAVARLOGOS

BibleWorks is a mature and powerful electronic concordance program which provides for any student, pastor or scholar the right tools to dig deeper into Scripture. Its new three-level-user system helps the beginner to not be intimidated by the many features of the program. The improvements in user interface and user-friendliness make this version especially appealing for those who have never worked with similar packages All in all, BibleWorks is a software package that warrants serious consideration.

Gerald A. Klingbeil,
Professor of OT and ANE Studies
River Plate Adventist University, Argentina

MODERN REFORMATION

The value of any software is found in how many ways it makes the task at hand easier. BibleWorks 5 is a definite value. It is quick, relatively easy to use, and filled with helpful resources. It is a "must have" for pastors and students who have some original language exposure. Laypersons without Greek or Hebrew experience may find BibleWorks is too much of a good thing. A cheaper, simpler Bible search program would probably meet their needs. If you're serious about exegesis, though, and have been waiting to purchase the right program, contact BibleWorks. Your wait is over.

Eric Landry, Managing Editor
Jan./Feb. 2003

INDEPENDENT REVIEW

Considering the powerful search capabilities, numerous databases, ease of use, good customer support, and price of BibleWorks, there is not a high level Bible study program that comes close to it. BibleWorks has significantly improved the efficiency, depth and quality of my study, teaching and preaching.

Erik Thoennes (Ph.D.)
Assistant Professor of Theology
Talbot School of Theology/Biola University

TRANSLATOR

I've been using BibleWorks for years now (3.5 up to the current, 5). Every single day, I work on my translation of the New Testament ... I'm writing to you this late-afternoon because I am so darn pleased with BibleWorks. While it, of course, helps with many other tasks, it has been essential to my translating. ... Anyway, thanks for offering BibleWorks to everyone!!

John Snyder
Bainbridge Island, Wash.

PREACHING MINISTER

I love [BibleWorks'] speed; its compatibility with MS Word; its comprehensiveness in Greek and Hebrew; its immediate, simultaneous Greek and Hebrew dictionary feature; its inclusion of all the English versions plus many foreign language ones; its inclusion of the Westminster Standards so that word searches are possible in the Confession and the Catechism, etc., etc. It is very powerful and worth every penny.

John Piper
Preaching Pastor, Bethlehem Baptist Church
Desiring God Ministries
Minneapolis, Minn.

EDITOR & PASTOR

If there was a "Golden Mouse Award" for elegant and cost-effective software, I'd nominate BibleWorks 5 for the prize...

Dr. Tony Cartledge
Biblical Recorder, N.C.

PROFESSOR

I want to thank you for making available your excellent program. I also want you to know that I have been both using it myself with great delight and have been recommending it to my students with unqualified enthusiasm.

I completed two books on New Testament themes this summer and fall, and your program has rendered the writing of them both effective and deeply satisfying. I tell my students I love nothing better than sitting in my office for hours on end doing Bible research with the capabilities your program offers. I have never known anything that makes such work highly efficient and productive.

Peter Jones
Chairman, Department of Biblical Studies
Westminster Theological Seminary in California

SEMINARY STUDENT

...Bible Works has cut the time I spend on my exegesis homework in half, (mostly because I don't have to look in five different books at the same time) and I am very happy with the way it is performing overall.

S. F.
Kentucky

APOLOGIST

BibleWorks 5.0 is simply the best Bible software available, anywhere. I have been using ... BibleWorks software since somewhere back in the "Version 2" days, and each new release has brought new and useful tools to the program. This is the program that runs 24/7 on my office computer, and it is the one that is running on my laptop when I engage in debates. It is invaluable to anyone doing serious exegesis of the text. If your pastor doesn't have BibleWorks, buy it for him. Make sure all your elders have it. Anyone teaching who has a computer will benefit from it. This is #1, everything else is just a substitute!

James R. White
Director of Alpha and Omega Ministries
Golden Gate Baptist Theological Seminary

PASTOR

I want to let you know that this program is just super!! I can't say enough about it... Thanks for all you do!

Bob Moffitt
Canton, Ohio

Testimonies

PROFESSOR

I have thoroughly enjoyed the BibleWorks program for my teaching purposes. I continue to use it extensively for class preparation as well as in the classroom to demonstrate to students this powerful and effective tool for biblical studies.

... My students learn how to let BibleWorks assist them in the translation and exegesis of biblical passages.

... For those students who are entering pastoral ministry (which is the majority of our students) and thus with limited time, BibleWorks is the best resource for teaching and preaching when consulting with the biblical languages.

Michael D. Matlock
Asbury Theological Seminary
